[REDACTED]  
Fairborne, OhioSubject: Clearance for FOG Project

25X1A

Dear [REDACTED]

Project Headquarters has requested that you be advised of the following security decision in order that you may indicate approval or disapproval.

We have been training personnel for assignment to both Customer A and Customer C projects. Since the equipment and training programs for both customer projects are identical, we have made it a policy to obtain Customer A clearance for both Customer A and Customer C personnel.

The training program gives the employee access only to information that is available to cleared FOG personnel at Del Rio, Texas. At Del Rio, the only clearance required is Air Force Secret. For this reason, Customer A has authorized FOG trainees to have access to instruction manuals and training programs as soon as they receive Air Force Secret clearance. This access applies only to FOG equipment, and no Customer A information may be released.

The above information was received from [REDACTED] the Customer A Security Officer at Edwards Air Force Base, and has been coordinated through the Security Office at Project Headquarters.

25X1A

Sincerely,

[REDACTED]  
Burt
